

MINI-CLI[®]

www.hunterindustries.com/MINICLIK

MINI-CLI IS THE SIMPLEST WAY TO SHUT DOWN SYSTEMS DURING RAINFALL.

FEATURES

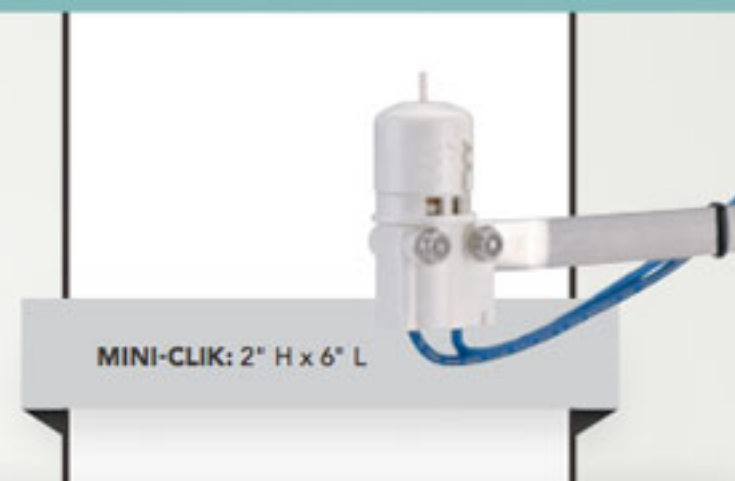

- Easily installs on any automatic irrigation system
- Debris tolerant for reliable operation and no unnecessary shutdowns
- Can be set to shut system off from 1/8" to 1" of rainfall
- Includes 25' of 20 gauge sheathed, two-conductor, UL-approved wire
- Optional user-installed metal gutter mount for Mini-Click[®] (order SGM)
- Warranty period: 5 years

SPECIFICATIONS

Switch rating: 24 VAC, 5 A

Wiring: Typically interrupts the common ground wire between the solenoid valves and the controller

UL listed

SPECIFICATIONBUILDER

MODEL	OPTIONS
MINI-CLI [®]	(blank) = No option HV = High voltage model for 110/220 VAC applications C = Conduit mount NO = Normally open switch

USER INSTALLED OPTION SPECIFY SEPARATELY

SGM = Optional gutter mount

EXAMPLES

MINI-CLI[®]	Mini-Click rain sensor
MINI-CLI[®] - C	Mini-Click rain sensor with conduit mount

FREEZE-CLI[®]

www.hunterindustries.com/FREEZECLICK

WHEN FRIGID TEMPS SET IN, FREEZE-CLI STOPS SPRINKLERS TO AVOID DANGEROUS, ICY CONDITIONS.

FEATURES

- Installs easily with no adjustment needed
- Accurate temperature sensing shuts system off when air temperature reaches 37° F
- Used with other sensors to enhance overall efficiency of irrigation systems
- Warranty period: 5 years

Note: Not intended for agricultural applications.

SPECIFICATIONS

Switch rating: 24 VAC, 5 A

Wiring: Typically interrupts the common ground wire between the solenoid valves and the controller
